Creative design

Complete projects (designer or interior design) aimed at interior design in which elegance and creativity find a perfect balance. The project is expressed through a constant dialogue between the search for colour and material combinations of natural inspiration.

RINASCENZA

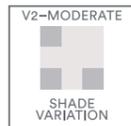

Curated with Nicola Gallizia, Rinascentza treats material as cultural language, linking Italian architectural memory to a clean contemporary voice. Four surface families offer tactile variety and measured elegance, letting designers build layered stories with consistent harmony in residences and curated public spaces.

Architectural design

Technical material in line with architectural trends, for applications such as industrial flooring and public buildings with medium to high footfall, such as airports, shopping centres, restaurants, offices, shops, as well as residential applications featuring a targeted aesthetic content.

FORMATECH

Co-designed with Gensler, Formatech captures the quiet character of plaster, concrete, and metal, turning honest textures into calm architectural surfaces. Subtle marks and soft patina add depth without noise, so spaces feel timeless and contemporary. Made for projects that value craft, clarity, and long-lasting design across refined homes, hospitality, and workplaces.
